

Dear Fire Service and/or Building Official or Community Leader,

In cooperation with Fire Team USA, we would like to invite you to a special day and a half informational and training conference on fire protection for your community. South Carolina was selected to be a point of delivery for the 2010 Fire Team USA workshop series! The workshop will be held on September 1-2, 2010 at the Charleston Marriott.

All you have to do is coordinate your team, sign up, and show up! Accommodations, training, and information is provided free of charge. Registration is easy, log on to www.fireteamusa.com and register by selecting "event date" and then selecting South Carolina. The Fire Team USA team will make your hotel arrangements and provide you with a confirmation and details. If you do not need a hotel room because you are able to commute, simply do not check the box for hotel room.

Fire Team USA is partnering for public policy with a focus on cooperating for quality communities. This seminar is an initiative to bring fire marshals, fire chiefs, elected officials, building officials, elected officials, and other stakeholders from communities across South Carolina together to learn and share fire prevention methods and alternatives that affect our quality of life. Public policy on fire protection is important in our communities for lots of reasons and a main concern is the well-being of our citizens as well as controlling the rising cost of providing such services. Let us come together and explore our options for the future. Policy makers, fire service officials, and other stakeholders must partner together to ensure that quality of life is maintained as our communities grow and transition.

Thanks to a grant administered by the U.S. Department of Homeland Security's Office of Grants and Training through the Fire Prevention and Safety Grants program, we are able to offer this important and informative session.

This informational and training seminar will explore current public policy, how community planning affects fire protection, fire prevention efforts currently underway, and how fire sprinkler legislation can assist in the future quality of life in our communities. We will also explore opportunities that exist for grants to assist local communities with their fire protection efforts.

Please, gather up your team and join us for the future of your community and our state. We would like to see representation from all areas of the state, keeping in mind that we do have limited seats available. Our website, www.fireteamusa.com will have the latest information and more details on the conference. You will be able to register online and we will take care of the rest! If you do not have internet access, and would like a paper registration form, please call us at 615-533-0305.
